Subject: hydro scoring
scoring conventions.doc

Hi Mike,

Just talked with Karyn about hydro scores. I can see that I needed to articulate basic scoring conventions before doing the hydro scores. I've done that, and then re-scored hydro functions based on both your scores and the conventions we've been (implicitly) using. I'm trying to get scores to Karyn by the end of the day. Do the attached scoring conventions and scores work for you (and especially, the water quality scores). If you need to call me, please do: **Ex. 6 PII**

Thank you!
